

CREST

An AI Native Family Office and New Age Asset Management Company

SECTION 01

FAMILY OFFICE

01

Family Office Architecture

Harmonizing Succession, Governance, and Execution

Why Family Offices Matter

Freeing founders and families to focus on what truly counts

WHAT A FAMILY OFFICE DELIVERS

- Translate family aspirations into actionable financial strategy
- Administer, protect and grow wealth across all asset classes
- Champion wealth stewardship and preserve intergenerational legacy
- Serve as a single, trusted point of contact for business and personal needs
- Support each family member's individual goals, ventures and passions

WHO NEEDS A FAMILY OFFICE

- **The \$3M Threshold:** Families with a net worth exceeding \$3 million who have outgrown standard private banking
- **Complex Needs:** Those requiring a centralized team to manage bespoke investments, estate planning, and tax optimization

HOW MANY FAMILY OFFICES ARE THERE GLOBALLY?

- Credit Suisse estimates that between 6,500 and 10,500+ family offices exist globally

DID YOU KNOW?

The Wealth Erosion Challenge

~70%

of family wealth erodes before the 2nd generation

~90%

dissipates before the 3rd generation

Root Causes

42%	Trust & communication breakdown
17%	Heirs unprepared to manage wealth
8%	Poor governance structure
3%	Tax and legal planning gaps

Attributes of Effective Family Office Governance

Six foundational pillars that define a well-governed, resilient and future-ready family office

1

Mission Statement

Develop a clear, enduring mission statement that captures the family office's purpose, values and strategic intent

2

Succession & Continuity

Establish robust succession and contingency plans to ensure leadership continuity and business resilience

3

Clear Communication

Embrace regular, structured communications across family members to maintain trust and shared understanding

4

Performance Reporting

Implement financial and performance-based reporting systems for accurate, timely and transparent oversight

5

Skilled Professionals

Engage qualified professionals — legal, financial and tax — to strengthen advisory depth and execution quality

6

Rights & Responsibilities

Clearly articulate the rights and duties of all owners, board members and management to avoid ambiguity

Introduction to CREST Family Office

A comprehensive, tech-enabled fractional family office tailored to the needs of high net-worth Founders and Value Creators across Asia

FOUR PILLARS OF CREST FFO

Asset Management

Portfolio construction, investment strategy and long-term wealth preservation across asset classes

Family Office

Holistic family wealth management — estate, tax, succession and legacy planning in one place

Technology

A tech-enabled platform providing real-time visibility, dashboards and digital tools for your wealth

Community

An exclusive network of high net-worth founders sharing insights, opportunities and experiences

CREST FFO DELIVERABLES

Investment Management

Portfolio strategy, asset allocation & wealth growth

Network Management

Curated connections across the founder and business owners ecosystem

Experience Management

Lifestyle, concierge & bespoke experiences

Your Team

Girish Singhi

Founder

Investments | Equities |
Real Assets | Capital Raise

- **Experience:** Raised and deployed over \$3B across asset classes with 17+ years of experience in Private Equity and Public Capital Markets.
- Advised large Single-Family Offices on investments across Public Markets, Real Estate, and Private Equity, while holding senior roles in renowned PE funds and global brands.
- Brings end-to-end investment management expertise across the lifecycle, including capital raising, sourcing, due diligence, transaction structuring, and exits.
- Operates as a Value Investor utilizing a PIPE (Private Equity Investment style in Public Equity) approach with a decade-plus track record of generating alpha across market cycles.
- **Education:** MBA from Faculty of Management Studies (FMS), Delhi.

Zuhaib Khan

Founder

Investments | Global Equities |
Capital Raise | M&A | Start Ups

- **Experience:** Advised on \$8b+ in transactions through deep experience in Private Equity and Investment Banking in the UK and India over his 17+ year entrepreneurial career.
- Advised large Single-Family Offices for portfolio and control investments across India, the Middle East, Europe, the US, and emerging markets.
- Zuhaib brings extensive buy-side M&A and due diligence expertise, having set up and scaled companies across Asia, Europe, and Africa in sectors including Fintech, E-commerce, Education, Ed-Tech, and Travel.
- Prolific angel investor in 57 startups globally; operates as a Value Investor utilizing both a PIPE and VC approach in early-stage deals.
- **Education:** MBA from Faculty of Management Studies (FMS), Delhi.

CREST FFO vs Traditional Family Offices

CREST FFO delivers the deep expertise and engagement of a Single Family Office at lower cost and a lower capital threshold

Parameters	Single Family Office (SFO)	Multi Family Office (MFO)
Min. AUM for Efficiency	~\$100 Mn+	~\$20 Mn+
Operating Costs (CIO, Research, Tech, Admin)	High — 0.50% to 1.50% p.a.	Substantially lower via economies of scale & shared resources
Family Involvement	Very deep; requires continuous family engagement	Flexible — as per the family's preferences and available time
Talent & Continuity	Finding and retaining specialized talent remains a persistent challenge	Wider talent pool; institutionalized delivery ensures continuity
Global / India Statistics	6,500+ globally; ~300 in India (as of 2024)	Not formally ascertainable
CREST Fractional Family Office	CREST bridges the SFO–MFO divide by combining: • Deep engagement with ~100 client families • Dedicated Family Office team • Network effect across specialized internal practices • Lower threshold ~3 Mn USD	

Key functions of CREST FO

Fee Alignment

Transparent fees deliver complete alignment of interests with the client

HOW IT WORKS

Distribution Engagement

CREST Engagement

SIDE-BY-SIDE COMPARISON

Criterion	CREST (Direct)	Typical Distribution Engagement
Mode of Investment	Direct Code Only · No trail commission	Broker Code · Commission embedded in NAV
Commissions	Zero commission to Portfolio Manager	Embedded in total cost · shared between distributor & manufacturer
Brokerage/ Transaction	Best-execution standard	Negotiated between client & distributor
Fee Transparency	Manufacturing & PMS/Advisory fees charged separately	Manufacturing cost and distribution commission not separable
Long-term Cost Efficiency	Structurally lower cost compounding over time	May lead to meaningfully higher costs over a 10-year horizon

02

SECTION 02

ASSET ALLOCATION

Wealth Pool

Single Family Office | Investment Structure & Asset Allocation

1. Wealth Pool Structure

Aspiration Pool

Focus: Moonshot
Risk Level: Very High
Target Return (p.a.): 25%+

Growth Pool

Focus: Wealth Growth
Risk Level: Medium
Target Return (p.a.): 12% – 18%

Safety Pool

Focus: Wealth Preservation
Risk Level: Low
Target Return (p.a.): 6% – 10%

2. Product Type Classification

Pool	Product Classification	Geography
Aspiration	Business · Bitcoin · Crypto · Startup · Angel Investments	Domestic + International
Growth	ETF · MF · Direct Equity · AIF · PMS · Direct Real Estate	Domestic + International
Safety	Debt · FD · Bonds · CP · CD · REITs · InvITs	Domestic + International

CREST Global Fund – Global Equity

DOMESTIC EQUITY :

CREST VALUE FUND

Introduction to CREST Value Fund

World Class Founding Team

- Founders have built, managed, advised assets over \$3B. Advised multiple Family Offices with assets over \$5B

Blend of multiple styles (fundamental with blend of technical)

- Long term value investors, capitalizing on compounding and tax efficiencies with technical analysis for optimal entry/exit

Alignment of interest

- Performance based fee model – we earn when you earn
- Single PMS scheme – All our stock picks be it a small cap or large cap, from IT or pharma, go into this basket alone

Private Equity Investing approach in public market

- Deep due diligence, long term value creation, valuation discipline, concentrated, high conviction investments

Track record

- 10 year track record with 40%+ IRR across market cycles; portfolio hit ratio >80%

Skin in the game

- Founders have significant portion of their net-worth in the PMS; eating at their own restaurant

Investment Framework

Our rigorous PIPE investment framework is built on seven fundamental criteria that guide our decision-making process. These strategic parameters ensure disciplined capital allocation while maximizing potential returns

Financial Performance

- **Return Threshold:** Each Position Must Generate >20% IRR
- **Return On Capital:** Incremental RoIC >20% Without Over-Earning
- **Growth Potential:** Earnings Can Grow >25% Annually For The Next Three Years
- **Valuation:** Available At Significant Discount To Intrinsic Value

Organizational Excellence

- **Strong Balance Sheet:** Healthy debt-to-equity ratio with sufficient working capital and strong cash flows to support operations
- **Strong Corporate Governance:** Independent board composition, transparent disclosures, and track record of protecting minority shareholders' interests
- **Management Quality:** Management Capable Of Creating Optionality By Pursuing New Business Vertical

Reasonable Valuations

- Companies should be available at a reasonable price and should have enough margin of safety.

Capital Allocation Skills

- Management's ability to allocate incremental capital to enhance shareholder returns.
- Over Longterm ability to earn Return on Invested Capital in excess of cost of capital.

Potential for High Growth

- We look for companies that are in high growth industries and have a large total addressable market.
- The company should be able to gain and sustain market share.

Longevity in Earnings Growth

- The growth in earnings should be sustainable over long periods of time and across business cycles, cash flows should be durable.

Superior Management

- We look for owner operator management teams that are aligned to minority shareholder interest.
- Key man risk is high and hence management team evaluation is the key.

Investment Selection Process

Portfolio Construction, Tracking and Rebalancing

Diversified Portfolio

- Portfolio on an average comprises 20-30 businesses
- Aim to generate 18%-20% CAGR for the portfolio over a minimum holding period of 3 years+ at any point of time
- Sector and market cap agnostic investing approach with bias towards under researched and well run firms

Allocation Flexibility

- No hard cap on flexibility from any idea or sector or market cap, but prudence to be maintained; allocation per stock may range from 2%-5%; exceptional opportunities may get allocation of 7%+ @ cost
- Decision on exit investment will solely be based on their business performance or their potential incremental IRR
- Will keep portion of portfolio in cash and cash equivalents if valuation of existing holdings and watchlist becomes exorbitant

Portfolio Tracking

- Track industry trends of portfolio companies like changes in competitive landscape, technology, regulation, supply chain etc
- Evaluate quarterly results of each company and benchmark performance against that of competitors
- Carry out detailed due diligence in case investment performance is not as per initial hypothesis

Portfolio Rebalancing

- Exit an investment if either valuation becomes absurdly expensive or there is a structural change in its business fundamentals
- Periodically rank portfolio companies based on valuation, earning performance, expected returns and rebalance accordingly
- Fresh or follow on a investment in an idea only if can deliver an attractive IRR over a period of 3 years

Portfolio Performance

Note: 1. Portfolio performance is as of 31st July 2026
2. This excludes securities transferred into CREST Value Fund that are not part of the core PMS holdings
3. The performance related information provided herein has not been verified by SEBI or any other regulatory authority

GLOBAL EQUITY :

CREST GLOBAL FUND

Executive Summary

The Opportunity

Global alpha is underutilised by most family offices. The best risk-adjusted returns over the past decade have come from specialist alternative managers in Asia, Global Macro, and Emerging Markets —yet most family offices have little or no exposure.

Our Solution

The CREST Global Fund of Funds provides curated, single-ticket access to world-class alternative diversified by geography, strategy, and return driver — managed by CREST's investment team.

Manager Universe

Fund A (Singapore, Multi-Strategy) · 76.5% annualized return since 2019, Sharpe 2.58 | **Fund B** (Global Macro) · 58.3% cumulative 3yr, max drawdown –4.5% | **Fund C** (Dublin UCITS, EM Value) · \$1.6bn AUM, 72.6% 1-year return 2.58 / **Fund D** (EM Value) · 95.6% cumulative 3yr, max drawdown –4.5%

Why Now

Geopolitical fragmentation, currency divergence, and rate-cycle dispersion create an ideal environment for global macro and EM strategies. Concentrated domestic portfolios face rising correlation risk that this fund directly addresses. AGI is our counter-weight in the FoF.

Our Manager Selection Process

Quantitative Screening	Minimum 3-year audited track record with risk-adjusted metrics (Sharpe ≥ 1.5, Max DD $< 15\%$). Universe filtered by AUM stability, strategy capacity, and fee structure. Annual return consistency ranked against peer against peer cohort.
Qualitative Due Diligence	On-site meetings with portfolio managers, operations, compliance, and prime brokers. Assessment of investment philosophy, process repeatability, team depth, succession planning, regulatory standing, and interest (own capital invested in fund).
Portfolio Fit	Cross-correlation analysis with existing holdings. Each selected manager must contribute measurably to portfolio-level Sharpe improvement. We reject high-return strategies that replicate existing factor exposures or add exposures or add correlation without diversification benefit.
Ongoing Monitoring	Monthly portfolio review with each manager. Real-time position-level monitoring where permitted. trigger points for strategy drift, key personnel departure, or AUM capacity breaches. Annual full re-allocations.

Universe Screening & Quantitative Gate

From a universe of 15,000+ global alternative managers, our two-stage filter reduces the investable set to 40–60 candidates before a single due diligence call is placed

THE INVESTMENT THESIS

Strategy mandate: Clear, documented, and consistent with historical positions

Operating history: Minimum 3 years audited track record (5+ preferred)

Structure: Regulated vehicle or institutional-grade Cayman/Singapore SPC

AUM floor: \$50M minimum (or credible seeded vehicle with Tier 1 LP)

Spotless record: No regulatory, fraud or headline litigation history

QUANTITATIVE GATE (STAGE 2)

Sharpe ratio: ≥ 1.5 over audited 3-year period (peer-group top quartile)

Max drawdown: $< 15\%$ over full track record; no single-month loss $> 10\%$

Consistency: Annualised return $\sigma < 25\%$; no single year $> 3\times$ average loss

AUM stability: No single-year net redemption exceeding 40% of opening AUM

Fee reasonableness: Management $\leq 2\%$; performance $\leq 20\%$; hurdle $\geq 0\%$

Qualitative Due Diligence: The 4 Ps

On-site assessment across People, Process, Portfolio and Philosophy — the global industry standard used by Cambridge Associates, Aon and Willis Towers Watson

PEOPLE

Who runs the money?

- PM track record pre- and post-fund launch
- Team depth — can the fund survive a PM departure?
- Own capital invested alongside LPs (skin in game)
- Succession planning & key-man provisions
- Reference checks: prime brokers, lawyers, existing LPs
- No undisclosed regulatory actions or litigations

PROCESS

How is alpha generated?

- Investment philosophy clearly articulated and stable over time
- Repeatable, documented decision-making framework
- Risk management integrated — not bolted on after the fact
- Position sizing methodology is rules-based, not discretionary
- Portfolio construction has defined concentration guardrails
- Back-tests are walk-forward validated, not curve-fitted

PORTFOLIO

What does the book look like?

- Attribution: does alpha derive from skill or disguised beta?
- Liquidity of underlying positions vs. stated fund terms
- Concentration risk — single position and sector limits
- Use of leverage, derivatives, short positions — sizing discipline
- Side pockets and gating provisions reviewed in detail
- AUM vs. estimated strategy capacity — headroom assessed

PHILOSOPHY

Does the manager think differently?

- Differentiated view vs. consensus — or just better execution?
- Long-term orientation; no short-term performance chasing
- Intellectual honesty: how does the PM handle being wrong?
- Willingness to hold cash / not invest without clear edge
- ESG and governance integration where financially material
- Cultural alignment with Crest's values and LP obligations

Portfolio Fit: Correlation & Factor Attribution

A high-returning manager who replicates existing factor exposures is a liability, not an asset. Every candidate must pass three independent portfolio fit tests before allocation

01 **Cross-correlation matrix**

We compute rolling 24-month return correlations between every candidate and every existing fund position. Any candidate with correlation > 0.55 to an existing manager is rejected regardless of return quality. Target: portfolio average pairwise correlation < 0.30.

02 **Factor attribution — Fung-Hsieh 7-Factor Model**

We decompose each manager's return stream using the Fung-Hsieh (2004) seven-factor model: equity market, size spread (small cap premium), bond market (duration), bond spread (credit spread), currency, commodity, and trend-following. Alpha that is simply disguised beta is disqualified — we pay active management fees only for genuine, uncorrelated alpha.

03 **Marginal Sharpe contribution (MSC)**

Each candidate must demonstrably improve the blended portfolio Sharpe ratio when added at a 20–30% weight. We simulate 10,000 monthly return scenarios using bootstrapped distributions. A manager is added only if median MSC ≥ +0.15 versus the portfolio ex-manager.

Weighted Selection Framework

Every manager is scored across 20 criteria in 5 weighted dimensions. Minimum composite score for allocation: 78/100. A score below 70 on any single dimension is disqualifying regardless of overall composite.

DIMENSION · WEIGHT · 5 CRITERIA
People & Team Weight: 25% PM track record · Team depth · Key-man risk · Alignment · References
Process & Alpha Weight: 25% Philosophy · Repeatability · Risk management · Attribution · Capacity
Portfolio & Risk Weight: 20% Drawdown · Volatility · Liquidity match · Concentration · Leverage
Portfolio Fit Weight: 15% Correlation · Factor independence · Marginal Sharpe · Strategy gap
Operations Weight: 15% Structure · Administrator · Auditor · Reporting · Fee terms
